About me

Dedicated IT Professional with 2 years of hands-on technical support and systems experience. Skilled in troubleshooting hardware, software, and network issues, managing modern operating systems (Windows, macOS, Linux), and resolving user support tickets. Backed by a Computer Science degree, bringing strong analytical, scripting, and debugging capabilities to technical environments. Reliable, detail-oriented, and ready to contribute to a growing team. US Citizen open to relocation within the US.

Education

Pontifica Universidad Catolica Madre y Maestra (PUCMM), BS in Computer Science Jan 2021 – Sept 2025
Engineering – Santiago, Dominican Republic

- Thesis: Smart Stock Analyzer: Inventory management optimization in collection centers via computer vision and automated hardware data capture

Experience

Package Handler, Fedex – Pittston, PA July 2026 – present

- Loaded trucks with packages

Paint Sales Associate, Lowe's – Wilkes-Barre, PA Mar 2026 – July 2026

- Engaged with customers to fulfill their needs
- Managed inventory using provided scanners and inventory systems

Systems Engineer, Adscon – Remote Dec 2025 – present

Freelance full-stack project focusing on asset management and reliable infrastructure deployment

- Managed end-to-end incident mitigation and technical requirements to build a stable system, optimizing daily administrative and hardware asset tasks.
- Designed an automated production backup architecture and secure storage infrastructure to safeguard active enterprise environments
- Documented tech-stack workflows and provided real-time tech support to optimize daily business operations

Web Developer, Decasystems Apr 2025 – Nov 2025

Systems development and hardware endpoint integration

- Integrated handheld warehouse scanners with the ERP web application, automating data entry for labeling and inventory tracking
- Resolved high-priority customer tickets, addressing configuration faults, system errors, and feature implementation
- Designed, developed and deployed scalable custom modules to facilitate the onboarding of new enterprise clients into the legacy ecosystem
- Conducted comprehensive system audits to patch security flaws and optimize the performance of critical REST APIs and endpoint connections.

Software support and inventory system adjustments

- Diagnosed and optimized database response delays, rewriting SQL queries to expedite reporting tasks for warehouse managers
- Engineered an end-to-end Product Batch Management feature, integrating it seamlessly into the existing ERP architecture
- Conducted rapid debugging and patch deployment for legacy code, resolving high-priority issues in a fast-paced development cycle

Skills

Technical Support: Incident Management, Device Lifecycle Management, Asset Inventory Tracking

Hardware & Peripherals: Desktop/Laptop components

Operating Systems: Windows 10/11, Linux

Productivity & Identity: Microsoft 365 (Outlook, Teams, OneDrive)

Networking: TCP/IP, Wi-Fi Troubleshooting, Routing & Switching basics

Core Tools & Dev: Git, Bash Scripting, Postman, JIRA, Docker, Java, Go, Python, PostgreSQL, SQL

Certifications

- Cisco Certified Network Associate (CCNA) - CISCO (In progress)
- Boot.dev's Learn Shells and Terminals Course - Boot.dev
- Introduction to Software Testing - University of Minnesota
- Database Change Management for Java Developers - JConf Dominicana
